

 Starts Mon 3 Aug 2026

 RT-03 · Sun 16 Aug 2026, 9:00–12:00

 ~5h45 study/day on tuition days · ~7h on off days

 4 chapters: Determinants & Matrices, Motion in a Plane, Structure of Atom, Basic Analytical Techniques

## TUITION-DAY SCHEDULE

Mon – Fri

| TIME                | DURATION | BLOCK                                                                                                                                                                                 |
|---------------------|----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 5:45 AM             | —        |  Wake up                                                                                             |
| 5:45 – 6:30 AM      | 45 min   |  Exercise                                                                                            |
| 6:30 – 8:00 AM      | 1h30     |  Study Block 1 (breakfast folded in near the end)                                                    |
| 8:00 – 11:00 AM     | 3h00     |  <b>Study Block 2</b> — your main block, use it for the hardest thing today                          |
| 11:00 – 11:45 AM    | 45 min   |  Lunch                                                                                               |
| 11:45 AM – 12:45 PM | 1h00     |  AI thing / read / rest — your call, no guilt                                                        |
| 12:45 – 2:00 PM     | 1h15     |  Revision block — yesterday's + 3-days-ago material                                                  |
| 2:00 PM             | —        |  Leave for tuition                                                                                   |
| 2:00 – 8:30 PM      | 6h30     |  Tuition (travel + classes)                                                                        |
| 8:30 – 9:00 PM      | 30 min   |  Home +  Dinner |
| 9:00 – 10:15 PM     | 1h15     |  Family time / study stuff — flex slot                                                             |
| ~10:30 PM           | —        |  Sleep                                                                                             |

Dedicated home-study time: ~5h 45m

## OFF-DAY SCHEDULE

Sat & Sun — no coaching

| TIME               | DURATION | BLOCK                                                                                                                                                                 |
|--------------------|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ~6:00 AM           | —        |  Wake up                                                                           |
| 6:00 – 8:00 AM     | 2h00     |  Exercise                                                                          |
| 8:00 – 8:30 AM     | 30 min   |  Breakfast / freshen up                                                            |
| 8:30 – 11:30 AM*   | ~3h00    |  <b>Study Block 1</b> — the biggest single block of your week, *flexes to 11 or 12 |
| 11:30 AM – 2:00 PM | ~2h30    |  Lunch + free time                                                                 |
| 2:00 – 5:00 PM     | 3h00     |  <b>Study Block 2</b>                                                              |
| 5:00 – 7:00 PM     | 2h00     |  Exercise / break                                                                  |
| 7:30 PM            | —        |  Dinner                                                                            |
| 8:00 – 9:00 PM     | 1h00     |  Study Block 3                                                                     |
| 9:00 – 10:00 PM    | 1h00     |  Family time                                                                       |

~10:00 PM

—

😴 Sleep

Dedicated study time: ~7h00 — your highest-leverage days

## 13-DAY COUNTDOWN PLAN

3 Aug → 16 Aug — what to study, which day

| Date       | Day     | Study Focus (slot into the blocks above)                                                                                                                                   |
|------------|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Mon 3 Aug  | Tuition | <b>Determinants &amp; Matrices</b> — Determinants: definition, properties, minors & cofactors                                                                              |
| Tue 4 Aug  | Tuition | <b>Determinants &amp; Matrices</b> — Matrices: types, algebra, transpose                                                                                                   |
| Wed 5 Aug  | Tuition | <b>Determinants &amp; Matrices</b> — Adjoint, inverse, matrix method for equations + full chapter practice set                                                             |
| Thu 6 Aug  | Tuition | <b>Motion in a Plane</b> — Vectors: types, addition/subtraction, resolution, dot & cross product                                                                           |
| Fri 7 Aug  | Tuition | <b>Motion in a Plane</b> — Relative velocity + Projectile motion                                                                                                           |
| Sat 8 Aug  | OFF     | <b>Motion in a Plane</b> — Uniform Circular Motion + full chapter practice. Use your $v = u + at$ at <i>Practice Bank</i> (38 Q) in Study Block 1 or 2.                    |
| Sun 9 Aug  | OFF     | <b>Structure of Atom</b> — all 5 topics start to finish (subatomic particles → Thomson → Rutherford → EM spectrum → Bohr model). One clean pass, you have the hours today. |
| Mon 10 Aug | Tuition | <b>Basic Analytical Techniques</b> — one focused read (lightest chapter, don't overspend) + begin cumulative revision                                                      |
| Tue 11 Aug | Tuition | <b>Cumulative revision</b> — Determinants & Matrices + Motion in a Plane, timed practice questions                                                                         |
| Wed 12 Aug | Tuition | <b>Cumulative revision</b> — Structure of Atom + Basic Analytical Techniques, timed practice questions                                                                     |
| Thu 13 Aug | Tuition | <b>Full mixed mock practice</b> — all 4 chapters together, hunt your weak spots                                                                                            |
| Fri 14 Aug | Tuition | <b>Weak-spot surgery</b> — redo everything you got wrong on Thursday's mock                                                                                                |
| Sat 15 Aug | OFF     | <b>Light only</b> — formula sheets, quick recall, zero new content. Sleep early.                                                                                           |
| Sun 16 Aug | TEST    | 🎯 RT-03 REAL TEST @ Vedantu, 9:00–12:00. You trained for this.                                                                                                             |

### WHY THIS ORDER

- **Heaviest chapters go first** — Determinants & Matrices (#1 in all of Maths) and Motion in a Plane (#3 in Physics) get first crack at your freshest weekday mornings.
- **The two off-days do the heavy lifting** — ~7 hours each vs. ~5h45 on tuition days. Sat 8 Aug finishes Motion in a Plane with real practice; Sun 9 Aug clears all of Structure of Atom in one sitting.
- **Basic Analytical Techniques gets exactly one day** — it's the lowest-weightage chapter on this test. One focused read is enough.
- **Last 5 days are revision, not new content** — cumulative passes, then a full mock, then fixing what the mock exposed. This mirrors your own MISSION 100 pattern: diagnostic → targeted drills → lock the marks.
- **Sat 15 Aug is deliberately light** — formula sheets only, sleep early, same rule you set for yourself before RT-02.
