

 Starts Mon 3 Aug 2026

 RT-03 · Sun 16 Aug 2026, 9:00–12:00

 ~4h15 study/day on tuition days · ~7h on off days

 4 chapters: Determinants & Matrices, Motion in a Plane, Structure of Atom, Basic Analytical Techniques

TUITION-DAY SCHEDULE

Mon – Fri

TIME	DURATION	BLOCK
5:45 AM	—	 Wake up
5:45 – 8:00 AM	2h15	 Exercise + breakfast / getting ready — no study yet
8:00 – 11:00 AM	3h00	 Study Block — your main block, use it for the hardest thing today
11:00 – 11:45 AM	45 min	 Lunch
11:45 AM – 12:45 PM	1h00	 AI thing / read / rest — your call, no guilt
12:45 – 2:00 PM	1h15	 Revision block — yesterday's + 3-days-ago material
2:00 PM	—	 Leave for tuition
2:00 – 8:30 PM	6h30	 Tuition (travel + classes)
8:30 – 9:00 PM	30 min	 Home +  Dinner
9:00 – 10:15 PM	1h15	 Family time / study stuff — flex slot
~10:30 PM	—	 Sleep

Dedicated home-study time: ~4h 15m

OFF-DAY SCHEDULE

Sat & Sun — no coaching

TIME	DURATION	BLOCK
~6:00 AM	—	 Wake up
6:00 – 8:00 AM	2h00	 Exercise
8:00 – 8:30 AM	30 min	 Breakfast / freshen up
8:30 – 11:30 AM*	~3h00	 Study Block 1 — the biggest single block of your week, *flexes to 11 or 12
11:30 AM – 2:00 PM	~2h30	 Lunch + free time
2:00 – 5:00 PM	3h00	 Study Block 2
5:00 – 7:00 PM	2h00	 Exercise / break
7:30 PM	—	 Dinner
8:00 – 9:00 PM	1h00	 Study Block 3
9:00 – 10:00 PM	1h00	 Family time
~10:00 PM	—	 Sleep

13-DAY COUNTDOWN PLAN

3 Aug → 16 Aug — what to study, which day

Date	Day	Study Focus (slot into the blocks above)
Mon 3 Aug	Tuition	Determinants & Matrices — Determinants: definition, properties, minors & cofactors
Tue 4 Aug	Tuition	Determinants & Matrices — Matrices: types, algebra, transpose
Wed 5 Aug	Tuition	Determinants & Matrices — Adjoint, inverse, matrix method for equations + full chapter practice set
Thu 6 Aug	Tuition	Motion in a Plane — Vectors: types, addition/subtraction, resolution, dot & cross product
Fri 7 Aug	Tuition	Motion in a Plane — Relative velocity + Projectile motion
Sat 8 Aug	OFF	Motion in a Plane — Uniform Circular Motion + full chapter practice. Use your $v = u + at$ at <i>Practice Bank</i> (38 Q) in Study Block 1 or 2.
Sun 9 Aug	OFF	Structure of Atom — all 5 topics start to finish (subatomic particles → Thomson → Rutherford → EM spectrum → Bohr model). One clean pass, you have the hours today.
Mon 10 Aug	Tuition	Basic Analytical Techniques — one focused read (lightest chapter, don't overspend) + begin cumulative revision
Tue 11 Aug	Tuition	Cumulative revision — Determinants & Matrices + Motion in a Plane, timed practice questions
Wed 12 Aug	Tuition	Cumulative revision — Structure of Atom + Basic Analytical Techniques, timed practice questions
Thu 13 Aug	Tuition	Full mixed mock practice — all 4 chapters together, hunt your weak spots
Fri 14 Aug	Tuition	Weak-spot surgery — redo everything you got wrong on Thursday's mock
Sat 15 Aug	OFF	Light only — formula sheets, quick recall, zero new content. Sleep early.
Sun 16 Aug	TEST	🎯 RT-03 REAL TEST @ Vedantu, 9:00–12:00. You trained for this.

WHY THIS ORDER

- **Heaviest chapters go first** — Determinants & Matrices (#1 in all of Maths) and Motion in a Plane (#3 in Physics) get first crack at your freshest weekday mornings.
- **The two off-days do the heavy lifting** — ~7 hours each vs. ~4h15 on tuition days. Sat 8 Aug finishes Motion in a Plane with real practice; Sun 9 Aug clears all of Structure of Atom in one sitting.
- **Basic Analytical Techniques gets exactly one day** — it's the lowest-weightage chapter on this test. One focused read is enough.
- **Last 5 days are revision, not new content** — cumulative passes, then a full mock, then fixing what the mock exposed. This mirrors your own MISSION 100 pattern: diagnostic → targeted drills → lock the marks.
- **Sat 15 Aug is deliberately light** — formula sheets only, sleep early, same rule you set for yourself before RT-02.
